POLARIZED

Sunglass *Readers*

WHSL \$ 59.50
MSRP \$ 119.00

AVAILABLE: July 10th, 2020

The constant changing from reading glasses to sunglasses (and back again) while outside is over. Caddis sunglass readers come with a high grade polarized lens designed for outdoor use and are available in these select frames. That “glasses on face with glasses on head” look at the beach, pool, lake, river, park, lunch, and 100 other places ends now.

Caddis sunglass readers are sunglasses with “back-side” bifocal reader lenses that allow the wearer to look through two areas of the lens. One area focuses on distant objects and the other is for reading at a close distance. The bifocal section is on the back of the lens so that’s it’s difficult to see from the front. The sun shade tint protects your eyes from harmful UV light and reduces reflected glare while reading.

Porgy *Gloss Black*
