

CADDIS LENSES

- High grade CR-39. Optically clear and shatter resistant.
- HEV blue light coating (HEV stands for High Energy Visible light). This helps block the harmful blue light emitted by screens. Overexposure to this light may have negative effects on your health contributing to eye strain, increasing the risk of macular degeneration and disrupting sleep cycles. Caddis lenses provide HEV Blue Light filtering so you can protect yourself from these adverse effects. Sun readers do not have HEV coating.
- Our lens coating is also anti-glare, hydrophobic and oleophobic. This helps eliminate reflections from overhead lights and allows people to clearly see your eyes. Oleophobic just means the lenses resist fingerprints.
- Our styles are offered in “half-steps” starting at +1.00 to +3.00, some styles come in +3.50.
- +0.00 in most styles. Ideal for younger customers who sit at a computer for hours each day or contact lens wearers/lasik patients who don’t always need reading magnification but want blue light protection.

CADDIS FRAMES

- Our frames are made of high-quality machined acetate with wire core temples which allow the arms to be heat-shaped to customize the fit.
- Acetate gives the frames the premium, solid feel.
- True optical frames that readily accept prescription lenses.
- Limited lifetime warranty on frames.
- Wire frames (Mabuhay) made of a nickel-free alloy.

CLEAR READERS

***All clear styles are currently full lens readers**

Miklos (#1)

- Medium/Large fit.
- Our most popular style that fits all but the smallest faces.
- Bowtie frame shape is flattering on almost all face shapes

Bixby (#2)

- Small/Medium fit
- Essentially a smaller version of the Miklos, Bowtie shape looks good on lots of face shapes.

D28 (#3)

- Medium/Large fit – largest style we offer
- Straighter brow and chunky frame make this a statement piece

Porgy Backstage (tie #3)

- Medium fit
- Slightly slimmer frame than the Miklos or D28. Packed with classic style that can’t miss.
- Works great for men or women. Same frame as the Porgy Sun.

Mabuhay (#4)

- Medium fit – looks good on small faces as well
- Aviator style with adjustable nosepieces
- Lightly tinted lenses still have HEV Anti-glare coating – not sunglasses

Navin (#5)

- Medium fit
- Classic “Clubmaster” shape never goes out of style. Geek-chic at its finest.

Mister Cartoon (#6)

- Collab with Mister Cartoon, celebrity tattoo artist
- Large fit, has been surprisingly well received by women who have no idea who he is
- Custom packaging with artwork by Cartoon

Soup Cans (#7)

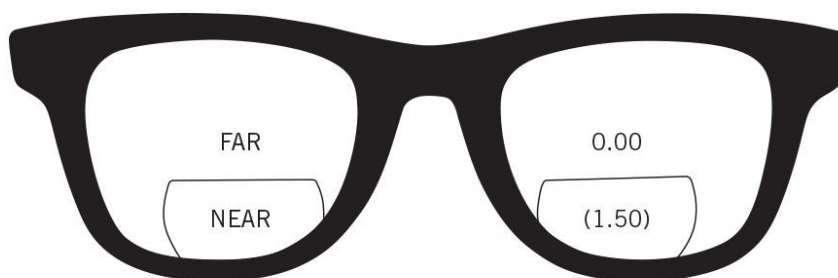

- Medium/Large fit
- Typically, round shapes are best on angular or chiseled faces.
- Layered acetate is visible in the black/white color detail
- Keyhole bridge keeps the style points up

Two Bird Theory (#8)

- Small fit – this is our smallest frame
- Spring hinges add to durability
- Keyhole bridge keeps the style points up

SUN READERS

***All sun lenses are currently “backside or hidden” bifocal readers**

Porgy

- Classic Wayfarer styling, medium fit, should work on everyone
- Backside or “hidden” bifocal segment makes it hard for someone looking at the wearer to tell it’s a bifocal
- Currently, non-polarized, 100% UV protectant lenses
- Upper part of lens has no magnification, ideal for reading at the beach or pool or just everyday wear

Bess

- Retro, rectangular shape, medium fit, shorter lens height compared to Porgy
- Should fit a wide variety of faces
- Backside or “hidden” bifocal segment makes it hard for someone looking at the wearer to tell it’s a bifocal
- Currently, non-polarized, 100% UV protectant lenses
- Upper part of lens has no magnification, ideal for reading at the beach or pool or just everyday wear

Housekeeping:

- Limited lifetime warranty – If something breaks under reasonable use, we will fix or replace it.
- We try our best to same day ship any orders that arrive to us before 2:00 pm MST.
- No sales on third party sites like Amazon, ebay, Sears Marketplace etc.
